EDUCATION

MASSBAY COMMUNITY COLLEGE

Associate of Science in Computer Science | GPA: 3.55

Wellesley, MA

Expected December 2027

Relevant Coursework: Java Programming I & II, Python Programming, Data Structures & Algorithms, Discrete Mathematics, Calculus I & II, Systems Programming with C, Computer Architecture and Assembly Language

WORK EXPERIENCE

BELUGA TECH

Software Engineer (Mobile/Web Dev Focus)

Kampala, UG

Aug 2021 – Dec 2024

- Programmed web/mobile enterprise AI chatbots for clients by integrating OpenAI models using Java Spring backend, RESTful APIs, and React.js frontend
- Researched and analyzed advanced AI agent architectures to explore the feasibility of autonomous decision-making within enterprise workflows
- Mentored 2+ employees with software development knowledge, study sessions, and embedded classroom support, strengthening my communication, leadership and teamwork abilities

PROJECTS

NANA's CLOSET

[View Project](#)

- Attracted 1,200+ visitors in the first week by building a Next.js, React, and Supabase e-commerce website for a luxury clothing retail store with operations across Africa with Zulu/English/Kiswahili multilingual support
- Improved user experience with a responsive Tailwind CSS design and Supabase-authenticated dashboard for content management

OXFORD BUSINESS SCHOOL (SCHOOL MANAGEMENT WEBSITE)

[View Project](#)

- Shipped a full-stack university management platform for a client utilizing React.js for the frontend and JavaScript for server-side logic, focusing on user interface design
- Integrated Supabase backend for scalable data management with efficient storage, retrieval, and real-time updates

EASYHR - EMPLOYEE MANAGEMENT APP

[View Project](#)

- Engineered a mobile SaaS application using React.js and Java Spring backend to help African businesses with employee management generates stock price predictions based on historical data
- Deployed 4+ features such as centralized employee database, automated payrolls, shift attendance and performance management.

TECHNICAL SKILLS

Programming Languages: Java, Python, TypeScript, SQL, C.

Frameworks: PyTorch, Next.js, React/React Native, Redux Toolkit, Node.js

Dev Tools: Git (Version Control), Docker, CI/CD, Linux

Libraries: pandas, NumPy, Matplotlib

Professional Certifications: AWS Certified Cloud Practitioner

Languages: English (Native), Spanish (Limited working proficiency)

Interests: Software Engineering, Artificial Intelligence, Data Science, and Machine Learning.

LEADERSHIP AND AWARDS

Member, CS Club: Engaged in code and resume review workshops, mock interviews, and peer tutoring initiatives

Member, International Student's Club: Engaged in club activities, cultural events, social gatherings and international lunch hour sessions.

Awards: 1x Dean's List Nominee (Spring '25);
